Subject Index

Analytical Techniques, Chemical

Determination of unsaturation of synthetic and natural rubbers by means of iodine monochloride, T. S. Lee, I. M. Kolthoff, and M. A. Mairs (*Errata*, article in *J. Polymer Sci.*, 3, 66–84, 1948), 303

Experimental study of copolymerization. II, P. Agron, T. Alfrey, Jr., J. Bohrer, H. Haas, and H. Wechsler, 157

Isolation and purification of polyvinyl acetate, *Letter to the Editors*, T. Alfrey, Jr., and M. Berdick, 899

Occurrence of head-to-head arrangements of structural units in polyvinyl alcohol, P. J. Flory and F. S. Leutner, 880

Potentiometric titration of viscose, P. Herrent and G. Jnoff, 487

Titration potentiometrique de la viscose. II, P. Herrent and G. Jnoff, 834

Analytical Techniques, Physical

X-ray diffraction patterns of stretched low temperature polybutadiene using molybdenum, cobalt, and chromium radiations, K. E. Beu, 801

Density of undrawn, drawn, and annealed nylon filaments, C. E. Black, III, and M. Dole, 358

Depolarization of light scattered from dilute macromolecular solutions. I. Theoretical discussion, P. M. Doty, 750

Depolarization of light scattered from dilute macromolecular solutions. II. Experimental results, P. M. Doty, and S. J. Stein, 763

An improved osmotic balance, B. Enoksson, 314

Low-angle scattering in polymers, O. Kratky, 195

Physical properties of fractions of GR-S and their vulcanizates, J. A. Yanko, 576

A suggested new method of determining molecular weight distribution. *Letter to the Editors*. F. Breazeale, 141

Surface tension of polyoxyethylene glycol solutions, A. Couper and D. D. Eley, 345

X-ray studies of low-temperature polybutadiene and butadiene-styrene copolymers, K. E. Beu, W. B. Reynolds, C. F. Fryling, and H. L. McMurry, 465

Cellulose and Cellulose Derivatives

Adhesion of high polymers to cellulose. Influence of structure, polarity and tack temperature, A. D. McLaren, 652

Cross linking of nitrocellulose studied with the ultracentrifuge and consistometer, I. Jullander and B. S. Blom-Sallin, 804

Deformation mechanism of cellulose gels. IV. General relationship between orientation of the crystalline and that of the amorphous portion, P. H. Hermans, J. J. Hermans, D. Vermaas, and A. Weidinger, 1

Die Kinetik des Celluloseabbaus und die langperiodische Struktur des Cellulosemoleküls, G. V. Schulz, 365

Interaction between cellulose nitrate in solution and inorganic salts, H. Campbell and P. Johnson, 735

Polymer solutions, H. M. Spurlin, 714

Potentiometric titration of viscose, P. Herrent and G. Jnoff, 487

Titration potentiometrique de la viscose. II, P. Herrent and G. Jnoff, 834

Degradation

Polymerization-degradation of styrene in solution, H. W. Spodheim, W. J. Badgley, and R. B. Mesrobian, 410

Thermal degradation of polystyrene. Part I, H. H. G. Jellinek, 850

Emulsion Polymerization (see also *Polymerization*)

Anionic redox activation of butadiene-styrene copolymerization, P. H. Johnson and R. L. Bebb, 389

Aroyl disulfides as promoter-modifiers for copolymerization of butadiene and styrene, R. L. Frank, J. R. Blegen, and A. Deutschman, Jr., 58

Carbonatotetramminocobaltic nitrate activation of butadiene-styrene emulsion copolymerization, R. Deanin, R. D. Lindsay, and S. E. Leventer, 421

Combination of potassium ferricyanide, diazothio ether and mercaptan as "catalyst" for emulsion polymerizations of butadiene and styrene, I. M. Kolthoff and W. J. Dale, 400

Copolymerization. VI. Mechanism of emulsion polymerization, R. G. Fordyce and G. E. Ham, 891
Hydrogen peroxide as catalyst for emulsion polymerization of butadiene and styrene, C. S. Marvel, R. Deanin, C. J. Claus, W. B. Wyld, and R. L. Seitz, 350
Inhibiting effects of certain phenols on GR-S polymerization, C. S. Marvel and N. A. Higgins, 448
Mercaptan derivatives as modifiers in the copolymerization of butadiene and styrene, R. L. Frank, S. S. Drake, P. V. Smith, Jr., and C. Stevens, 50
Mercaptan structure and regulator activity in emulsion polymerizations, R. L. Frank, P. V. Smith, F. E. Woodward, W. B. Reynolds, and P. J. Canterino, 39
n-Octyl mercaptan as modifier for emulsion polymerization at high temperature, C. S. Marvel and C. D. Lewis, 354
Polymerization of allyl compounds. IV. Emulsion polymerization of allyl acetate, P. D. Bartlett and K. Nozaki, 216
Polymerization of styrene in soap solutions, V. J. Frilette and W. P. Hohenstein, 22
